LITTLE ITEMS OF LOCAL INTEREST

Paul Hotson, Jeweler and Optometrist, Acme, has complete eye testing apparatus here every Thursday. Entrance through Regal Gas office. Mr. Hotson is an expert in his line.

Roy English left last Saturday to take over the principalship of the Holden school.

Commencing September 15, the bus will leave Carbon every morning at 8.30 and returning will leave Calgary at 4.30 p.m.

Gottlieb Ohlhauser and family spent the week end holidaying at Banff.

There will be English Church services in the Farmers Exchange hall next Sunday at 7.30 p.m.

John Atkinson, who was injured the day of the Stampede, was hurt worse than was at first suspected and it will be some time before he will be able to be around again.

J.A. MacDonald was a week end visitor to Calgary.

P.W. Rouleau of Calgary was a Carbon visitor on Thursday.

Miss Florence Swansburg has accepted a position in Calgary and Miss Neville has been employed to fill the vacancy in the C. H. Nash store.

R.C. Barr was a Carbon visitor this week.

Mrs. Ryan left last Friday for her home in the East, after spending a couple of weeks visiting with her brother and sister-in-law, Mr. and Mrs. J.J. Greenan.

In the Carbon Tennis Club Ladies' doubles, Miss Fraser and Irene Nash defeated Mrs. Peters and Miss Neville in the semi-final 3-6, 6-4, 6-2. They now have to meet Miss K. Ramsay and Miss E. English in the final.

—C. H. Bothamley, jeweler, will be at Peters Store every Thursday with an up-to-date stock of Diamonds, Watches, Jewelry, etc. First class repair work done while here. Leave repairs at Peters store.

Several good second hand binders for sale cheap, John Deere, McCormicks, Massey-Harris, and Deering—Alex Reid. 3tc

The following was recently received by Mr. Elliott at the local post office:

to postmaster will you please see that this gets to all newspapers of Canada. I am trying to find my boy he has been gone ever since 1913 that was the last time I heard from him he was at Alberta Canada so that is the reason I am riting to you and I have took this means to find him. This is what I want publish:

"to Mr. Olen Jefferson Schadwell, please rite your mother at Clinton, Ills, her address is Ollie Goward, 1108 Easte main street."

Please oblige me and I will thank you from the bottom of my heart. May God bless you for it is my prayers.

OLLIE GOWARD

CARBON SCHOOL FAIR TO BE HELD SEPTEMBER 13

The sixth annual school Fair will be held in Carbon on Thursday, Sept. 13, and exhibits will be shown in grains, vegetables, live stock, poultry, household science and school work. There will also be a program of athletics.

Special prizes will be offered for outstanding work done in several branches and the judging will be done by a staff sent out from the Olds School of Agriculture.

All exhibits must be in before 10 a.m. the morning of the fair. If desired, some of the exhibits could be brought in the evening before. Everyone is cordially invited to attend.

HALSTEAD—WRIGHT

A quiet wedding was solemnized in Calgary on Saturday, Aug. 25, when Ethel, eldest daughter of Mr. and Mrs. S. N. Wright, of Carbon, became the bride of Mr. Leo Halstead, also of Carbon.

Mr. and Mrs. F.J. Bessant, Cyril, Harry and Wilfred Poxon, returned on Tuesday after spending a week holidaying at Banff.

Mrs. Gordon Harvey returned on Monday from a two weeks visit with her sister, Mrs. A. Gillespie, at Kyle Villa, Sask.

Mr. and Mrs. Johnson have moved into the house recently left vacant by Mr. and Mrs. Geo. Harmon and family.

Mr. J. McFarlane arrived last week and is visiting with his brother, Dr. L.G. McFarlane.

Jas. Stout of Acme was a Carbon visitor on Tuesday.

Yesterday afternoon was the last of the Wednesday half holidays for this year.

F. C. Moyer and Joseph McKenna of Drumheller and J.J.W. Grenier made a business trip to Calgary on Monday.

Miss Kate Ramsay returned on Tuesday after a month's holiday spent at Coast points.

Mr. and Mrs. A. F. McKibbin and young daughter were Calgary visitors this week.

TENNIS PLAYERS WIN AT ROSEBUD

A number of the Carbon tennis players went over to Rosebud on Sunday to participate in an inter-club match and the Carbon players were successful in winning six out of the nine events.

Men's Singles—V. Hawkins lost to C. Sangster of Rosebud, 4-6; C. H. Nash lost to Mr. O'Farrel, 1-6.

Men's Doubles—Hawkins and Peters won from O'Farrel & Gross 6-4; L. Poxon and B. Ramsay won from Clarke and Demenn 6-1.

Ladies Singles—Mrs. Laing won from Mrs. Sangster 6-1.

Ladies Doubles—Mrs. Laing and Mrs. Willson won from Mrs. Sangster and Mrs. O'Farrel 6-3.

Mixed Doubles—Len Poxon and Mrs. Willson won from C Sangster and Mrs. O'Farrell 6-2.

Irene Nash won the junior ladies singles by default.

Junior Men's Singles—W. Edwards lost to D. Sangster 4-6.

Work Commences on New Elevator

The lumber for the new Pioneer elevator has been here for some time and last week the construction gang arrived and work has commenced on the new building. Construction work is going ahead with great rapidity and it will only be a matter of a couple of weeks before the elevator is completed. Mr. T. Johnson, who has been employed with the Midland Grain Co. for the past year, will have charge of the new elevator.

The reason some merchants have to charge so much is that they have to charge everything.

Li'l Gee Gee says the trouble with tennis is that they always put the net where the ball lands.

Probably nature provides a woman with a double chin so that when one gets tired she can use the other.

An excellent way
To avoid growing old
Is to tell a red-headed woman.
That she has the disposition
Of a scorpion.

Velocity is what a fellow lets go of a wasp with.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WORLD HAPPENINGS BRIEFLY TOLD

Stephanos Skouloudis, premier and foreign minister of Greece in 1915 and 1916, during which he was a proponent of Grecian neutrality, is dead.

Vancouver will be the scene of the 1929 convention of the Canadian Pharmaceutical Association, it was decided at a session of the convention in Toronto.

President Coolidge has accepted the resignation of Secretary Hoover from the cabinet and appointed Wm. F. Whiting, of Holyoke, Mass., to succeed him.

Unofficial announcement is made that the Western Canada Airways Ltd., will make Regina a stopping place on the trans-Canada air mail route, provided the municipal air harbor is put into proper shape.

Captain Donald MacMillan and his crew of 11 men will leave Anaktok Bay, Labrador, where they have been quartered during the past year and will start back to civilization at once, according to radio advices.

Petting parties and the recent increased use of cigarettes by women are responsible for the spread of "trench mouth," Dr. Isador Hirschfeld, of New York, declared today at the seventh annual convention of the American Dental Association.

Raymond Poincare, premier of France, was host at a party held on the 68th anniversary of his birth. The party consisted of a simple family luncheon at his modest country home, at Champigny, a few close friends having been invited.

Parisian police are working out an elaborate system of identifying criminals by their ears. While the fingerprint system is admittedly good it is said, there is some uncertainty about it. With ears, however, no two sets of which are alike, police hope to construct a better system of criminal tracing.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Buffalo At Elk Island
Elk Island National Park is a reservation for the preservation and propagation of the buffalo. Seven hundred and twenty-six buffalo are now in this park, together with a number of mule deer, elk, and moose.

Farmer (to friend): "I hear, Bert, that while ye were in the city ye took up this here golf. How'd ye like it?"

Bert: "Well, it ain't bad. It's a bit harder than hoein' turnips an' a bit easier than diggin' potatoes."

A Rubdown

Exercise will not cause stiffness if you'll massage your body with Minard's.

Farmers' Marketing Tour

Canadian National Railways' Tour
To Great Britain and
Denmark, 1928

(Continued.)

The return to Edinburgh was made under pleasant conditions, sunshine replacing mist and snow. That evening dinner was followed by one of the most interesting and certainly most discussed addresses of the tour. This was the talk by Dr. F. A. E. Crew, Director of the Animal Breeding Research Department, Edinburgh University, who spoke on "Animal Breeding—Some Scientific Aspects." Dr. Crew's address was remarkable, not only for the skill with which he traced the discovery of scientific laws and set forth the limitations of selection, but for the point of view taken. The modern breeder, he contended, had their beginnings in the vision of an artist, the breeder, and the more or less accidental appearance of one or more superior individual animals, and again and again Dr. Crew stressed the aspect of the ideal without which there could be no truly great advance.

Nor was the evening remarkable only for the inspiring address of Dr. Crew, for during the dinner we were introduced to haggis, which was piped in with all honors by Mr. Sharpe of our own party, and afterwards were entertained by the Earl of Elgin, who himself sang for us in a rich baritone "My Hair's in the Heilands," his favorite song, first telling us that it was sung in his honor at the Canada Club, in Toronto, when he visited there. He also told us how, after spending a week in hospital at Winnipeg, he was convalescing at the home of a friend in that city, listening to the radio, when to his surprise he heard the announcer at C.N.R.W. (the Canadian National Railways' Broadcasting Station) wishing him a speedy recovery. The Earl, a grandson of the 8th Earl, who long ago was stoned in Montreal, gave us the most delightful example of comradely informality that we had experienced in the tour.

The occasion was also noteworthy for the presence of so many of Scotland's leaders of scientific agriculture, including Sir Robert Greig, Mr. Archibald MacNeillage, editor of the Scottish Farmer and Secretary of the Clydesdale Society, both of whom spoke to us, and for the excellent chairmanship of Mr. W. A. Wilson, Agricultural Products Representative for Canada, who set the proceedings to a happy note which was not the least enjoyable feature of a memorable evening.

Hitherto our engagements had prevented us from viewing Edinburgh itself, but the morning of our last day in "The Athens of the North" gave us our opportunity.

From the Castle we were able to see the beauty of her setting, the majesty of her seven hills, the handsome buildings, the spacious grandeur of Princes Street, the noble monuments, the wynds and closes of the Old Town and, beyond the city, the loveliness of the countryside. As the Tower of London is to England, so is Edinburgh Castle to Scotland. Here again the past enveloped us. Once more we were in touch with its struggles, its victories, its defeats, its heroisms, its cruelties and sacrifices. The esplanade by which we had approached the Castle was for centuries the scene of executions by axe and stake. Here scores of "witches" were strangled and burned. How strange to learn then that this very esplanade is held to be part of Canada! In the reign of Charles I., the esplanade was declared an integral part of Nova Scotia (New Scotland), so that baronets created under the commission of William Alexander, Earl of Stirling, might "take seisin" of their new possessions, a decree which has never been annulled.

The Castle is entered by the drawbridge over the old moat. The pathway is cut through the solid rock, and the walls of the portcullis gate are 15 feet thick. Accompanied by a guide who evidently loved every inch of Castle and rock, we saw the Argyll Battery on the edge of the cliff, St. Margaret's Chapel, the Palace Yard, the Crown Room, the old Parliament Hall and the National Memorial.

St. Margaret's Chapel is the smallest Norman Chapel in Britain, being only 17 feet by 11. Today the children of soldiers of the garrison are baptized in it. In the Palace Yard, at the time of our visit, surrounded by wreaths of poppies in honor of Earl Haig, we saw the widow of Mary Queen of Scots' bedroom, where was born James the Sixth of Scotland, and First of England. The Crown Room contains the "Honors of Scotland," the crown, sceptre and sword of state and other jewels comprising the Scottish Regalia. Here too is the oak chest in which the regalia lay concealed for over 100 years, after having been hidden under the pulpit of the Church of Glinneff, Kincardineshire at the time of Cromwell.

The Old Parliament Hall, once the meeting place of the earlier Scottish Parliaments, is now a museum of offensive and defensive armour, specimens of which were demonstrated to us.

How shall one describe the National Memorial to the soldiers and sailors, and others who fell in the Great War? Here is enshrined the heart of Scotland. In the central

No high-grade tea can be expected to retain its full flavor and strength unless packed in moisture-proof, metal-lined containers. Successful tea planters ship their tea in aluminum—the same rust, dust and damp-proof material which keeps Red Rose Tea always so fresh, strong and flavory. 3-W

shrine—the bare rock thrusting through the floor—a simple steel casket, cedar-lined, reposes. It contains the Rolls of Honor of the Scottish Nation. They were carried there by twenty-eight bearers and placed in the casket by the Prince of Wales. Then began the filing past of pilgrims from every part of Britain, at their head the King and Queen. In the Hall of Regiments and round the shrine itself the story of the War is told in stained glass, in bronze panels and in mural relief. The nation in arms, the sailor, the soldier, the civilian, the nurse, the V.A.D., the fallen, the wounded, the sick, the widowed, the fatherless are symbolized, the gaining of the victory, and the price that was paid.

No man can walk through Scotland's Hall of Honor without being touched to the depth of his soul or read unmoved the words behind the shrine: "The souls of the righteous are in the hands of God. There shall no evil happen to them. They are at peace."

(To Be Continued.)

Giant Dirigible Flight Delayed

British Machine Will Not Be Ready
For Flight To Canada This
Year

The giant dirigible R-100, which Great Britain is building in competition with the German LZ-127, will not fly to Canada and the United States this year, Commander C. D. Burney told the Associated Press.

Failure of contractors to deliver parts on scheduled time and the necessity for extended trial flights have caused postponement until next year.

Commander Burney said that the winter would be no deterrent to the flight and if the R-100 is ready by the early months of 1929 she will make the flight by the southern route.

Trial flights will take at least two months and there is no chance of their beginning before December.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

No Thought Of Retiring

"The newspapers retire me occasionally, but I will give sufficient notice before leaving office," said Hon. Howard Ferguson, premier of Ontario, when asked in an interview as to rumors that he might retire from the Conservative leadership. Mr. Ferguson has returned from a tour of Europe.

Minard's Liniment cleanses cuts, etc.

Chinese Pheasants Released

Saskatchewan hunters will have added to their respective hunters' paradises a novel feature with the introduction of the Chinese ring neck pheasant, a bird that is very similar to the Hungarian partridge. Thirty of these birds have been introduced into Saskatchewan, and were released half-way between Lovers and Al-sask, in the western area.

BABY GIRL HAD DIARRHOEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes: "Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhoea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me,

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhoea and was running around as well as ever."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

SEPTEMBER 2

PAUL IN THESSALONICA

Golden Text: "The opening of Thy words giveth light."—Psalm 119:130.
Lesson: Acts 17:1-15; Romans 15:18-20; 1 Thessalonians 5:12-23.
Devotional Reading: Psalm 119:9-16.

Explanations and Comments

Three Sabbaths in the Synagogue at Thessalonica, verses 1-4.—"Although at Philippi we had suffered greatly, and had been insulted, yet on we came to your city and boldly declared to you the gospel of God in spite of great opposition"—in some such words Paul wrote to the Thessalonians (1 Thess. 2:2). From Philippi Paul and his companions passed through the cities of Amphipolis and Apollonia on the way to Thessalonica. There they tarried several months, as we know from Paul's letters to the church he founded in that city. "You remember, brethren," Paul also wrote, "how we worked day and night to support ourselves, while we preached unto you the gospel of God: for we would not be a burden to any of you" (1 Thess. 2:9).

Our historian, however, records only Paul's preaching for three successive Sabbaths in the synagogue. He "reasoned with them from the Scriptures," Luke says; that is, he cited Scripture passages which were prophetic of the Christ; he then showed that Jesus fulfilled these prophecies, that it behooved the Christ to suffer and to rise again from the dead, and thus he reasoned, or argued, that the Jesus whom he proclaimed to them is the Christ.

Mary Queen of Scots once cried out to John Knox: "You teach one thing, the Church of Rome teaches another; which shall I believe?" Knox's answer is memorable: "Ye shall believe neither, madam; ye shall believe God, who spaketh His word, and save as we agree thereto, ye shall believe neither of us." Every conviction should be tested by the spirit and teaching of Christ.

The result of Paul's preaching was that many of the devout Greeks (Greeks who attended the synagogue and worshipped God), and many of the chief women, were convinced of the truth of his message and "consorted with Paul and Silas," cast their lot in with them and shared their way of life. They were afterwards zealous in extending the good news that Paul brought them, for in his letter Paul says, "From you hath sounded forth the word of the Lord, not only in Macedonia and Achaia (Greece), but in every place your faith to Godward is gone forth."

Recipes For This Week

(By Betty Barclay)

NECTAR ICE CREAM

1 pint milk.
1 egg yolk.
1/4 cup sugar for custard.
1 pint whipping cream.
1/2 cup sugar, caramelized.
1 teaspoon vanilla.
1 cup nectars raisins, plumped and cooled.

Caramelize sugar, add 1 cup scalded milk and stir until dissolved. Add remaining sugar to egg yolk and combine with milk to make a custard. Cook until the custard coats the spoon. Remove from fire, add cold milk, cream, vanilla and salt. Freeze to a mush consistency, then add raisins and continue freezing until hard.

FLOATING ISLAND

3 egg whites.
4 tablespoons sugar.
3 egg yolks.
1/4 cup sugar.
1/2 teaspoon salt.
1 1/2 cups scalded milk.
1/2 teaspoon vanilla.

Beat the whites until stiff. Add 4 tablespoons sugar. Drop by tablespoonfuls into a shallow pan of hot water. Bake in a moderate oven until delicately brown. Remove cooked whites into a serving dish.

Prepare custard sauce; Mix yolks, sugar and salt in a bowl, add scalded milk slowly. Return to double boiler and cook until a coating is formed on metal spoon. Remove immediately. Add flavoring. Pour around cooked whites in a large shallow bowl. Chill before serving.

If we do not watch, we lose our opportunities; if we do not make haste, we are left behind; our best hours escape us.

For the first time a film has been shown in an aeroplane. It took place in a machine travelling from Paris to London.

Athletes—Keep Minard's Liniment handy.

WRIGLEY'S P. K. CHEWING SWEET

Here is a treat that can't be beat! Benefit and pleasure in generous measure!
Peppermint Flavor

Want Royal Commission

Should Study From Every Angle
Problems Of Immigration and
Assimilation

Speaking of the resolution passed recently at the Saskatoon conference of provincial groups interested in immigration, that a royal commission should be appointed by the government of Canada to "study from every angle problems of immigration and assimilation," J. A. Stoneman, president of the United Farmers of Canada, Saskatchewan section, said that a royal commission, efficiently constituted, would command the confidence of the public. "It can perform a great deal of work which members of the House of Commons have neither the time nor facilities to do," he declared. The suggestion of a commission had been already approved by the U.F.C. Saskatchewan section and organized labor, as well as by the Canadian Legion at its last national convention, he pointed out.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Young Farmer Wins Prizes

Success Attends Efforts Of Graduate
Of School Of Agriculture

A 19-year-old farmer, I. C. Shank, of Athabasca, 85 miles north of Edmonton, won a first prize for wheat grown in 1927, and a first for 1928 oats at the Edmonton Exhibition held recently.

This young man, after one year's course at the Alberta Government School of Agriculture, at Olds, took up the growing of registered seed grain on a farm of his own at Athabasca, and in open competition with other exhibitors in the province of Alberta, achieved the success noted.

Had Dandruff And Pimples 2 Years Cuticura Healed

"I was troubled for two years with dandruff and pimples. The pimples were scattered over my face, neck and head. They were hard, large and red, and festered and scaled over. They itched and burned badly, and when I scratched, it caused them to spread. The dandruff affected the growth of my hair, and it fell out badly. I lost a lot of sleep on account of the trouble."

"I sent for a free sample of Cuticura Soap and Ointment and after using it I got relief. I purchased more, and after using three cakes of Soap and two boxes of Ointment I was healed." (Signed) J. W. Polenchuk, Donwell, Sask.

Use Cuticura Soap, Ointment and Talcum to promote and maintain skin purity, skin comfort and skin health; the Soap to cleanse and purify, Ointment to soothe and heal, and Talcum to powder and refresh.

Sample Each Free by Mail. Address Canadian Depot: "Stenham, Ltd., Montreal." Price, Soap 5c, Ointment 25c and Talcum 15c. Cuticura Shaving Stick 25c.

Where Co-operation Is Needed

The movement of ten thousand unemployed British miners to Canada to work as harvest hands in the grain fields of the West is so significant, and may have such far-reaching results, that it warrants additional consideration to that already given in a previous article in this column.

Suppose the situation was reversed and there was a surplus of tens of thousands of farmers' sons and farm hands in Western Canada who could not find employment, while, on the other hand, there was a shortage of miners in the coal-mining districts of the British Isles, and the experiment was tried of transporting an army of men from the grain fields of the West to the mines of Britain.

Under such circumstances the sympathy of the people of Canada would go out to their sons as they journeyed to an unfamiliar country to engage in work of which they had no knowledge or training, and to live under conditions entirely new to them. There would be hope in the hearts of the relatives and friends of those men that the British people and the mine bosses would be considerate in their treatment, lenient in their judgments, sympathetic and patient in assisting the strangers to adjust themselves to their own environment and make good.

Fortunately for Canada its sons do not have to go abroad in order to find work and opportunity, because nowhere in the world today is work more plentiful, nowhere do greater opportunities present themselves than in Canada. This very fact should, however, but provide a greater incentive to our people to extend a heartening welcome and a helping hand to these British miners.

Judging by numerous statements made by these men, the vast majority of them have come to Canada with the right spirit, — a real determination to "make good" and achieve not merely a temporary but a permanent success in this country. They come wholly inexperienced in the work they are to undertake. Instead of working eight hours a day, they will be required to work from early dawn till dark, but the spirit of the men was expressed by one of them on the eve of sailing when he said that eighteen hours at work in the open fields and fresh air of the prairies would not be any worse than eight hours under ground in a coal mine.

Enroute over the ocean, the first group of miners wireless back to the British Government that they were determined to succeed, and at the port of landing in Canada, and again at Winnipeg, Regina, Moose Jaw, and other points of distribution, man after man expressed the same view, namely, that they were anxious to make a success in Canada and were hopeful of securing work after the harvest and becoming permanent citizens of the Dominion.

These men by the act of their coming to Canada as harvest hands have shown that they prefer work, even hard unaccustomed toil, to living in idleness on the "dole" in Britain. Each and every one of them had to pass a rigorous physical examination before being allowed to sail. They are, therefore, the pick of the unemployed miners, and, animated by a desire to "make good" they should succeed if given a fair chance, and a helping hand and encouragement.

That chance, assistance and encouragement should be forthcoming in large measure from the Canadian people as a whole and, in particular, from the individual farmers who employ them. It will be necessary to show these men how their work should be done and how to do it. This will require tact and patience. Too much must not be expected of them. And the man who makes an honest effort to learn, who shows a real determination to work and render service to his employer, is deserving of every encouragement.

Such encouragement cannot be better shown than by a kindly, sympathetic attitude a personal interest in the man's welfare, and, in all cases where it is possible to do so, by the offer of a job for the winter. The knowledge that, if he shows a disposition to make good, he will be provided with work for the winter, and thus given his opportunity to become a permanent settler in Canada, will provide the greatest possible incentive to a man who is desirous of achieving that result. And it is settlers of this British type of which Canada stands in need.

If both parties to this unique experiment strive to make it a success there is no reason why it should not succeed, and if it does prove successful, — its success being judged by the results of the movement as a whole rather than by individual cases, — then it will, in all probability, prove the beginning of a new and worthwhile immigration from the congested groups of the unemployed in the British Isles to the open spaces of Canada, where, through their labor, such people will be an important factor in bringing large tracts of vacant lands under cultivation, and in providing the necessary man-power to develop many of the as yet untouched natural resources of the Dominion, thus making comfortable homes for themselves and adding immeasurably to the productive capacity, wealth and prosperity of Canada, and incidentally of the Empire as a whole.

No Menace To Consumer

British Delegate Returns Home Favorably Impressed With Wheat Pool

"We do not agree with those who see in the pools the menace of a monopoly to the disadvantage of the consumer," writes Henry J. May, general secretary of the International Co-operative Alliance, who was one of the principal speakers at the recent international wheat pool conference.

Mr. May expresses his views in the Co-operative News, published in Manchester, England.

He states that the economy of production on large scale methods, the elimination of the middlemen's profits and improvement in selection of seed, made it possible for wheat pool members to reap larger profits from their crops and at the same time to give better values to the consumers.

Dairying An Important Industry

Dairying is one of the oldest and one of the most important of the industries of Canada. It owes its modern development to the introduction of the factory system for the making of cheese and butter, to the invention of the centrifugal cream separator, and to the facilities afforded by improved methods of cold storage.

Huskies For Byrd Expedition

Will Collect 100 Dogs In Quebec To Be Used In Polar Venture

To procure 100 huskies for Commander Richard E. Byrd's forthcoming Antarctic Polar venture, is the task that has been entrusted to a party that has left Quebec on board the SS. North Shore, in quest of the right type of canine for the hazardous undertaking. The party is to comb the north shore of the St. Lawrence. When secured, the hundred dogs will be loaded on the steamer and brought to Quebec to be shipped to the Pacific coast, where they will be picked up by Commander Byrd.

WAS VERY DELICATE

New Health Came Through Using Dr. Williams' Pink Pills

Mrs. Caspar Miller, Lourdes, N.S., says that twice in her lifetime she has reason to be thankful for what Dr. Williams' Pink Pills did for her. She says: "I was a very delicate girl going into womanhood, when I first found benefit from Dr. Williams' Pink Pills. I was a sufferer with cramps and pains every month and was hardly able to move around at all. One day when I was very sick a friend came in to see me, and she said to my mother, 'Why not try Dr. Williams' Pink Pills. I know they will do her a world of good.' The result was my mother got six boxes and I began their use, and I soon found benefit from them. By the time I had taken them all I felt an altogether different girl and no longer suffered from cramps and pains."

Then a few years ago I was attacked with influenza, and was sick for six weeks. Again I started taking Dr. Williams' Pink Pills, and again they brought me good health. I am the mother of a family and do all my own work, so you see I have to keep in good health, and depend upon these pills to keep me so. Now I always recommend Dr. Williams' Pink Pills to any of my friends who may be sickly."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sugar Beet Culture

Can Be Raised In Widely Separated Parts Of the Dominion

In an analysis of sugar beet culture in Canada, the Department of the Interior, through its Natural Resources Intelligence Service, points out that beets of excellent quality for sugar can be grown in many widely separated parts of the Dominion — good seed being produced as well. Formerly good seed had to be imported from France, Germany, Russia and Denmark. Outstanding localities for sugar beet growing are the warmer parts of Ontario, the Okanagan Valley of British Columbia, South Alberta and the Maritime Provinces.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke of vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Reindeer For Hudson's Bay Area

12,000 Reindeer From Alaska To Be Sent Overland

Shortly after the fawning season is over, 12,000 reindeer will be herded from Alaska to the shores of Hudson's Bay, according to N. A. Branson, of the Dominion Reindeer Company. This is due to the rapid increase of the herd of 1,249 animals started in Alaska thirty years ago. Progress will be slow, the herd travelling about ten miles per day. But first, the shortest route must be found and charted.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Where People Are Good

The nearest thing yet discovered to approach "heaven on earth" is the little island of Eigg, in the Inner Hebrides. There is no record of a police case within living memory or the natives, according to the report brought back by scientists and historians who have visited there.

Sodium Phosphate

Dry Product From Saskatchewan Sent East As Trial Shipment

The Sodium Phosphate Refining Co., at Fusilier, Sask., recently put through a trial run and shipped 700 pounds of the dry product to Toronto and a similar shipment to Montreal, via the Canadian Pacific Express, for test. If this product proves as successful as anticipated, carload shipments to the two centres will follow shortly. The firm has about 3,000 tons of the raw material to dehydrate before winter — about 27 cars. The winter may find the plant working twenty-four hours a day.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Year's Shipment Of Wheat

In the 1927-28 crop year ended July 31, last, a total of 261,000,000 bushels of wheat was handled through the elevators at the head of the Great Lakes, situated at Port Arthur and Fort William, Ontario, on Lake Superior.

Veterinaries use Minard's Liniment.

Knowledge may be power, but it is seldom powerful enough to move a stubborn man.

Heavy Apple Crop

Increase Of Almost 900,000 Boxes Of Apples From Okanagan District Is Indicated

An increase of almost 900,000 boxes in the shipment of apples from the Okanagan fruit district is indicated in a report issued today by T. P. White, superintendent of car service, Canadian National Railways, Winnipeg. The latest estimates indicate that the "McIntosh" crop will amount to 1,252,460 boxes as compared with 738,493 boxes last year, or an increase of 513,967 boxes or 69 per cent. The total apple crop, which comprises largely the "McIntosh" and the "Wealthy" brands, is expected to amount to 3,928,355 boxes this season, which is an increase of 890,845 boxes over last year.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

Social Worker: Do you believe in the transmigration of souls?

Fisherman: Well, no sir. I like 'em fried in the ordinary way.

Powerful!

90,000 Horsepower is the amazing total amount of current produced by Eveready batteries in a single year!

The strong current and uniform long life of these Dry Cells and Hot-Shots have made them the first choice for all types of farm ignition.

Always buy Eveready Hot-Shot for work in exposed places. The metal cases protect your power supply against exhaustion during damp nights or in wet weather.

Look for the name Eveready before purchasing. If it's not an Eveready it's not a Hot-Shot.

CHAPTER XXXI.—Continued.

Jack was lying on the couch while Eva sat beside him, the light so shaded that he could not see her face. She sat motionless through it all. He told of his return from the north and finding her gone; of his suspicions, confirmed, as he thought, by seeing her in Edmonton; of his sudden resolve to enlist; and lastly of his meeting with Arthur Warner. "I don't know," he concluded, "what is the explanation of the Winnipeg affair, but I know Helmi is innocent. She was sent to that place by someone and is shielding that person. Look at her letters, Eva—read them—and to think I doubted her and left her alone when she needed me!"

Eva took the letters in her cold hands, but she could not read a word.

"I got the news of my baby from another man," said Jack brokenly, "and it was his money Helmi got instead of mine to help her. Helmi had to beg for work and suffer insult. See what she says there—'No one wanted a girl with a baby.' Wasn't it damn-able, Eva? I rage when I think of it. I blame myself—I shouldn't have believed anything. I knew how sweet and good and true she was—I knew! But the person that sent her for the dope and then slid out is the person who should be shot, and I'll sift it to the bottom when I go back. . . . Poor Helmi, bearing it all because she was too honorable to tell!"

In his excitement and deep emotion Jack did not notice that his sister had not spoken, but sat with bowed head, like a broken lily.

It was one of the soft nights when the blossoms are just beginning to scent the breeze, when there are those indescribable stirrings and whisperings of spring. Even if nations are at war and planning the destruction of each other, trees leaf and blossoms open. The streets seemed quiet to Jack; but for the heavy rumbling of the busses no one appeared to be abroad.

Suddenly the silence was broken by a weird, spitting noise as of giant fire-crackers; a sound of deadly import to the people of England, for it gave warning of the approach of enemy air craft.

W. N. U. 1748

"It's an air raid," Eva answered, without stirring. "They run to the tube stations; but I never go—I feel safer here—I have a dread of being smothered in those terrible places. I've been through three air raids already. So I am not afraid."

Eva spoke with a composure which was not assumed; anything was better than the maddening remorse that had swept over her as Jack told his story.

Jack went to the window and looked down into the street. Through the open window came the drone of the enemy's Zeppelins, malevolent, horrible, like the buzzing of some poisonous fly. Then came the continuous cannonading of the anti-air craft guns, like wildest days of battle. The searchlights combed the sky with their ghostly fingers, and people came tearing out of their houses and raced through the dark streets.

Jack had often wondered how people would act during an air raid. He felt no fear for himself—it didn't occur to him that he could be in danger here in London—his fear was for Eva. "Haven't we better go, Eva?" he asked anxiously; "it seems to be almost above us. Is the tube far away?"

"Not far—but I never go. Come away from the window. There—that's a bomb—not far away. . . . We're in for it, Jack, they're coming nearer. . . . Come here, Jack, I feel dizzy—come to me—I want to tell you something. I knew your Helmi in Winnipeg. She is not to blame. I sent her, Jack. Forgive me—I sent her to the Chinaman's! Ask her to forgive me, too. I have been sorry ever since."

A bomb burst in the square. There was a shattering of glass and a crashing of masonry; a horrible confusion of noises, tearings, screamings, concussions, clanging fire-engines.

By a strange chance the house in which Eva had her suite stood, though many houses in that vicinity fell. All the windows were shattered, and on the window sill of the room in which they stood was thrown the body of a little dead dog.

On the floor, where she had fallen, Eva lay, a piece of shrapnel in her cheek.

Jack stayed in London until Eva was out of danger. She would recover, the white-uniformed doctor at Guy's told him, but of course she would be badly scarred.

Behind her bandages, Eva smiled feebly. "It's all right Jack," she said wanly, holding his hand; "better women than I have been blown to pieces. Maybe God is giving me a few more years to atone for what I have done. I have been a poor sport, Jack—I needed a smash of some kind. I am not complaining. Life is queer, Jack, isn't it? I wanted to show Humphrey I wasn't as selfish and shallow as he thought. He told me in the last quarrel we had, and the only one, that I would never be an old woman—I would only be a state novelty. I was determined to show him I had some thought of doing things for other people, so I came here and got into the V.A.D. work. What I really wanted to do was to drive an ambulance in France, but I was afraid, not of death, but of disfigurement. I hate ugliness so—far more than sin."

"It was my hatred of ugliness, not of sin," Eva continued, "which cured me of the drug habit. I had learned to take dope just because it gave me a thrill—it saved me from dullness; but I saw an addict—one of the doctor's patients—a woman something like me, but horrible to look at—pasty-faced, dead-eyed, mouth agape and I could see I might some day

be like that. So, Jack, I never touched it again."

Eva paused for a long time; "But now, with a blue scar on my cheek and my nose broken I will not be afraid. I will go to France. Maybe I can take the place of some better and happier woman, and when the shell comes marked for her, it will take me instead. And Jack," she continued, "you will tell Helmi all of this and ask her to think kindly of me as she can. She loved me once with all a young girl's adoration."

Jack kissed his sister tenderly with a deep sorrow in his heart. He could not reproach her—there was no need, but his own heart was aching with the sorrow of it all. Sin and sorrow—the age-old partnership—sin and sorrow. By one man sin came into the world and death by sin; but the one who sins is not always the one who suffers.

Jack had cabled Keith, his former partner, from Paris to send to London one thousand dollars. But when he reached London he found that no reply had come. Thos. Keith of Winnipeg, could not be found. He had left the city over a year ago, and his creditors had not been able to trace him.

Jack sat on one of the wooden benches in the cable office in London and thought, in a queerly detached way, of what this meant to him. He wondered at his own calmness in the face of such a smashing blow, for the gold mine on the Nehanni, with all the comfort and luxury it would bring him, had been much in his thoughts during the cheerless months of imprisonment. He had planned many generous surprises for his companions, too. . . . And now it was all over. He had been following a false light. . . . He had been warming his hands at a painted fire.

Well, there was about two hundred dollars coming to him from the War Office, and he would be given transportation home. Prisoners who had escaped through a neutral country were not allowed to go back into the army.

When the Olympic sailed out of the harbor at Liverpool into the muddy waters of the Mersey, Jack stood on the deck looking back at the receding shores of England. Behind him lay bitter thoughts and much disillusionment; the futility of war; the hideous wastage of young life; the horrible suffering and slaughter. . . . and Eva, his only relative! He choked with bitter memories as he thought of it all. Then there came to him, beating up through all this, like a fountain of sweet water in the sea, the memory of Arthur Warner and his unselfish love, and of Helmi, with her clear, sweet soul and her honorable silence.

Jack walked to the prow of the vessel and looked away into the gray distance. Behind him lay the sorrow for the past, with its mistakes and regrets. Before him lay Canada—his own country—Helmi, and little Lili.

(To Be Continued.)

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word *genuine* printed in red? It isn't the genuine Aspirin without it! A drug-store always has Bayer, with the proven directions tucked in every box:

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

THE CANINES

You have referred to your dog Rover as a canine—that is what he is. This tooth, then, that is the first in line behind the incisors, is called the canine, from being extra well-developed as in the dog and other carnivorous animals.

It is the most primitive type of tooth, and is known also as the cuspid, and as the "eye tooth," this last being only a popular designation.

Being observant, you have likely noticed that of the temporary teeth, this one was the last to be lost—serving thus, to keep the upper and ridges in right relationship for their permanent successors during the process of shedding the temporary teeth.

But it may be that it remained in place unduly long, for not infrequently in the upper jaw, the permanent cuspid, though developing, does not erupt, in which case the temporary cuspid should be retained as long as it remains firm and sound, depending solely on the advice and responsibility of your dentist.

Now notice this point: Overlying the root of the upper canine, is an elevation, the "canine eminence," which serves to keep the tissue at the angle of the mouth well filled out. Then should you lose this tooth, this eminence disappears, with the resultant falling in of this tissue, giving you prematurely the appearance of age.

So, if you would keep your youthful appearance, beware. See to it that your "eye-tooth" stays sound, and free from the clutches of your dentist's forceps.

Little Helps For This Week

"Give, and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall men give into your bosom."—Luke vi. 38.

Dig channels for the stress of love, Where they may broadly run; And love has overflowing streams To fill them every one.

For we must share if we would keep That good thing from above; Ceasing to give we cease to have, Such is the law of love.

—Richard Chenevix Trench

It is only the most pitiable of heart poverty that feels as if it could do nothing to add to the happiness of other lives, and does not even make the attempt. And where no love is given, the life shrivels and narrows until none can be received. The soul itself is refreshed and enlarged by the stream of love that flows through it; this is the true well of water springing up within unto everlasting life.—Lucy Larcom.

Both parties should remember that they are married for worse as well as better.

Sleep and Repose

Doctor Says Sleep Becomes a Vicious Habit When Carried To Excess

Sleep becomes a vicious habit when carried to excess, said Dr. H. M. Johnson, "sleep expert" at the University of Pittsburgh. Most people, Johnson believes, get sufficient rest in the course of six and a half to nine hours to carry them through the day and make their work enjoyable.

Sleep is vicious, he said, when it interferes with more interesting activities. Dr. Johnson studied 90 persons of both sexes ranging in age from 16 to 63 years in an attempt to discover the secrets of sleep. Women are less restless than men as a rule, he finds, and spend more time in bed. Persons engaged in mental activity during the day, sleep less than persons engaged in work that only feebly stimulates.

Are You Ready

When your
Children Cry
for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the cruelest pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's

Through Canada's Inland Ocean

1. The Great Lakes Steamer S.S. Assiniboia, of the C.P. Fleet which carries its passenger through the land of charm. 2. Serving a little bovril during the trip. 3. The passengers companions and well-wishers of a bon-voyage.

The Great Lakes for a summer holiday have no equal. Contrary to the generally prevailing opinion that the automobile and touring and camping are a greater attraction, these large bodies of fresh water, really inland seas, are holding their own, indeed, by those who know it is said that they are doing more.

From Port McNicoll to the Head of the Lakes, is practically an ocean voyage. The great white steamers of the Canadian Pacific Railway are operated the same as the huge ocean liners. At Port McNicoll the visitor sees a man made harbor, surrounded by a village which has been developed from the original within the last twenty years. About an hour and a half after leaving port, a bugle sounds the dining call, and going below the traveller finds the dining-room spacious and comfortable which greatly whets the already huge appetite.

After dinner a promenade of the broad white decks, as motionless as the city streets, but with what a difference! The fresh clean breeze stiffens, the sun strikes the horizon and sinks in blazing splendour leaving behind a sense of peace and well-being. Host upon host of graceful white-spread wings appear over the stern, crying the poignant call of the hungry gull. So still they are as to appear motionless, a floating bit of white feather; but a chance opening of the cooks galley port hole brings them swooping down, screaming with the wildness of the blizzard, with a strength and speed that is amazing.

Land slowly disappears, and the islands are lost in the soft enfolding darkness. Stars come out, and a white moon floods the lake with an ethereal beauty. All is quiet—a friendly intimate quiet—broken

here and there by a merry laugh, a passing footstep, the throb of the great engine and the spark on the wireless up above. A little later we pass the protruding Bruce peninsula, then the Manitoulin Island, the home of the Great Spirit. In the distance can be seen the blinking light of the mariners' guides, the light-houses at Cabot's Head, Lonely Island, the Flower Pots and in the further distance ahead, Cove Island, the marking point of the entrance to Lake Huron.

These steamships, the "Keewatin", "Manitoba," and "Assiniboia" of the Canadian Pacific service are first-class in every way, and ply these inland waters from May 21st. to September 28th. The journey occupies the better part of three days, with every wave bringing further charm and amazement at the unfolding beauty of the trip.

Here and There

(123)
Tourist traffic to Saint John this season is the largest in its history, and so far is equal if not greater than during the whole of last season. Tourists started arriving earlier this spring, and have continued in much larger numbers than in other seasons.

Colonel Scott, who is successfully producing tulip bulbs at Salmon Arm, British Columbia, believes that the industry has a future. He has one acre under this production with drying, cleaning and storage sheds. He grows fifty-two varieties of bulbs and has about a quarter of a million bulbs on hand growing.

The Alberta Amateur Championships will take place shortly at Banff, Alberta, where the annual Highland Gathering and Scottish Musical Festival is being held from August 31 to September 3. An elaborate programme has been arranged of a Scottish character, many of the athletic contests being peculiar to that race, such as tossing the caber and putting the shot.

Plans are reported to be on foot among sheep raisers to establish in Vancouver a wool grading centre similar to that functioning in Trenton, Ontario, where at present most of the wool business of Canada is conducted. An authority states this would probably have the result of increasing the returns to the producer from 25 to 50 per cent.

Although the automobile is sometimes said to be a rival to the railroad, it gives the latter a great deal of trouble. The number of freight cars used by the Canadian Pacific Railway for the transport of automobiles has doubled during the past five years, and the latest order of 300 new cars for the company has just been completely filled.

Trans-Atlantic records have been made by two new vessels, the "Duchess of Bedford" and the "Duchess of Atholl," the first two of the new cabin class quartette to be built by the Canadian Pacific Steamships. The former has just accomplished an eastbound voyage from Liverpool to Montreal in six days fourteen and a half hours, while her sister ship, enroute at the same time, made a westbound crossing from Montreal to Liverpool in six days, 13 hours.

The second school car operated jointly by the Canadian Pacific Railway and the Ontario Department of Education has been issued from the Angus Shops, Montreal, for service in the district west of Port William. The car is a remodelled first class coach equipped like an up-to-date "little red schoolhouse" with bright classroom, with blackboard, globe, school books, regulation desks, and so forth; a library for the use of students and adult visitors as well; and comfortable living quarters for the teacher. The school car is able to reach remote areas where permanent school facilities are not available.

Mythical "Summer Slump"

In early and experimental stages of advertising certain months of the year were poor in business. Mid-summer was one of these periods and the "summer slump" became a byword among merchants. It was accepted as a necessary and incurable evil. Instead of increasing their advertising to improve business, merchants virtually suspended advertising on the theory that business was not to be had.

Suddenly someone discovered that the "summer slump" was an hallucination of an unbusinesslike mind. It must have been a distinct shock to the old timers when they discovered that the reason they were not doing business in the summertime was because they were doing no advertising. It did not speak well for the vision of these pioneer business men that they were so long in learning this secret of advertising; that advertising should be used most extensively at those periods in the year when business needs an artificial stimulant. The business of advertising is to make business.

With the aid of newspaper advertising many businesses have transformed the "summer slump" into a "summer boom." They have produced goods the public needs and wants during the warm months and have carried the news to the consumers through advertising.

Those who have something to sell, locally or nationally, will neither see nor feel this mythical summer slump if they do more and better advertising. There is more money in circulation during June, July and August than during any other three months of the year. Why then should there be less business?

Lecturer says men imitate women. Nonsense! You don't see any men with their pants cut off above the knee, showing pink rosebuds on their Paris garters!

The vicious dog fish of the Pacific coast has at length found his niche in the scheme of economic usefulness, judging by a new industry getting under way in Vancouver. Dog fish oil is the base of a preparation for keeping away mosquitos, black flies and other insect pests which molest man and beast alike. Several barrels a day of dog fish oil are being used in the manufacture of the preparation.

A Pacific Coast mariner whose name is well known throughout the country has announced his intention to retire from active service. Captain James D. Troup, veteran of 55 years of continuous service on Pacific coastal waters, 36 years of which he spent in British Columbia, has relinquished his position of manager of the British Columbia coast steamship service of the Canadian Pacific Railway. His place has been taken by Captain C. D. Neroutsos, formerly assistant manager.

Golf in the heart of the Canadian Rockies is becoming so popular that a miniature course has been opened at Castle Mountain Bungalow Camp in Vermilion Pass on the Banff Windermere Highway. This new course is probably the highest, smallest and most effectively situated of any golf links in the British Empire. The ingenious lay out of the course is the handwork of Stanley Thompson, internationally known golf architect, who also designed the recently enlarged links at Banff.

IN THE RACE FOR BUSINESS

The gentleman on the tortoise represents the man who does not advertise—the one who tries to do business as it was done in the days of the tallow candle or the oil lamp.

Are you in the glare of the electric light—in the automobile of Modern Methods?

Our Want Ads. are high voltage batteries, whether you want light or power—business publicity or competent help.

GOVERNOR SMITH STATES POLICY IN VIGOROUS SPEECH

Albany, N.Y.—With all the force at his command Alfred Smith, governor of the state of New York, told an expectant nation what he would do if elected president. In aggressive fashion, he accepted the Democratic nomination with a speech which not only set forth his stand on prohibition, agriculture, foreign relations and other public questions, but accused the Republican administration of a failure to keep faith with the people.

As millions listened in by radio, the new leader of the Democrats advocated modification of both the Volstead law and eighteenth amendment, reiterated that he would give the problem of controlling crop surpluses his immediate attention if elected, assailed the administration's Nicaraguan and Mexican policy, and pledged himself to a "real" endeavor to outlaw war.

He also called for a reorganization of Federal Government activities on a business basis; declared that neither he nor the Democratic party contemplated "sudden or drastic" changes in tariff schedules; reaffirmed his stand for public ownership and control of waterpower; promised a square deal for war veterans; stressed the need for inland waterway development, reforestation and conservation of natural resources, and advocated "progressive legislation for the protection and care of working men and women."

While standing "squarely" on the Democratic platform declaration for restrictive immigration, the nominee asserted that he was "heartily in favor of removing from the immigration law the harsh provision which separates families," and was "opposed to the principle of restriction based upon the figures of immigrant population contained in a census 38 years old."

British Warship Not Welcome

Soviet Government Will Not Permit Warship To Transfer Bodies Of Submarine Crew

Moscow, U.S.S.R.—The Soviet news agency Tass says that in response to a British request through the Norwegian mission to Moscow, that Great Britain be allowed to send a warship to transfer the bodies of the crew of the recently raised submarine L-55 from Leningrad to England, the Soviet Government has replied that it cannot consent to a British warship entering Soviet territorial waters.

The Soviet Government would not object to a warship of a friendly nation such as Norway or a British merchantman coming.

The L-55 was sunk in 1919 while assisting the white Russians against the Bolshevik Government but recently was raised by the Soviet authorities, who found a number of "skeletons of British seamen."

May Remodel Liquor Act

British Columbia May Follow Lines Of Quebec System

Victoria, B.C.—"We are just stock taking now," Hon. R. P. Pooley, attorney-general in the new Conservative cabinet stated. "We can't say much about things until we have finished that."

The attorney-general intimated however, that there would be lots of action soon and agreed that the liquor act was one that would receive early attention. Conservatives in touch with party leaders have suggested that the British Columbia act may be remodelled somewhat after the lines of the Quebec Act.

Would Adopt Drastic Measure

Toronto.—The Chief Constables' Association of Canada, in session here, appointed a committee to urge Ottawa to fingerprint all immigrants, lengthen the residence period required for naturalization from three to ten years, make criminal misconduct grounds for deportation of even naturalized citizens, and widen the identification act to fingerprint even vagrants.

W. N. U. 1748

Advice To Dairymen

Hon. C. M. Hamilton Says Industry Here Is Not Behind Other Countries

Ottawa, Ont.—Bringing back some friendly advice for Canadian dairymen, Hon. C. M. Hamilton, minister of agriculture in Saskatchewan, reached Ottawa. He is returning from the world's dairy conference in London, where 1,800 delegates represented nearly every country in the world. "Canadian dairying," Mr. Hamilton observed, "does not appear to be behind other countries in the line of production and manufacturing. The main difficulty seems to be in the uniform high standard of the herds. In that, we are somewhat lacking but it is not surprising since, in a number of the provinces, dairying is largely a side line."

"To establish ourselves in the British market, as producers of butter or cheese, bacon or any other agricultural product, we must not only place, on the market the highest quality but also a steady volume. Merchants whose customers have developed a taste for a certain thing, want to be able to supply it continuously and that is where we sometimes fall down."

Mr. Hamilton tells of the Hon. W. R. Motherwell's travels. He has motored all over the British Isles and is going to France, Belgium, Germany, Italy and "finally up to the Scandinavian countries to see if they have anything on us in the line of agriculture."

Joins Scottish Club

Lord Lovat Becomes Honorary Member Of Club In Toronto

Toronto.—A distinguished Scot was added to the honorary membership of the Scottish Club of Canada, when the club honored Lord Lovat, parliamentary under secretary for Dominion Affairs, who is in Toronto for the purpose of conferring with the Ontario government on immigration matters. In accepting the honor his lordship reminded the membership that they could do much good by extending a friendly hand to boys who come out from the British Isles.

Less Drunkenness In England

Convictions Show the Lowest Total For Nine Years

London, Eng.—According to the official statistics of convictions for drunkenness in England published today, the most sober city in the Kingdom is the most historic seaport Plymouth and the city with the most proportionate convictions is the pretty but rather sleepy cathedral town of Norwich, in Norfolk.

Convictions throughout the country totalled 65,000 during the year, a decrease of 1,900 and the lowest total in nine years.

Support For Stresemann

Berlin, Germany.—Foreign Minister Stresemann, meeting with the new German cabinet for the first time since his recent illness, made an extensive report on the foreign situation with emphasis on the forthcoming renunciation of war treaty ceremonies at Paris and the League of Nations meeting at Geneva. He found the cabinet members in accord with him.

Will Be Proclaimed King

Belgrade, Jugo-Slavia.—Transition of Albania from a republic into monarchy is being rapidly consummated, according to advices received here from Tirana and from frontier points. These reports state that Ahmed Zogu, president of the republic, is to be proclaimed king within a few days.

Charged With Violating Sales Tax Act

Toronto.—Police acting under orders of the federal government arrested eight men and two women here on charges of violating the Dominion Sales Tax Act. The accused are all officials and employees of manufacturing firms. Bail in each case was fixed at \$5,000.

Police Active At Coast

Vancouver.—Determined to put an end to the epidemic of safe cracking in Vancouver, Acting Chief of Police Dan Leatherdale announced that a powder squad of special automobiles and armed with sawed-off shotguns will patrol the city each night.

FIGHT ILLEGAL LIQUOR EXPORT

Gordon N. Shaver, K.C., has been appointed by the attorney-general of Ontario to act as special crown prosecutor in the proceedings against liquor export companies at Windsor as a result of seizure of about \$5,000,000 of liquor along the Canada-United States border by the Ontario liquor control board in its fight against illegal export.

Prosperous Saskatoon

City's Financial Position Never Better Than At Present Time

Saskatoon, Sask.—Saskatoon's financial position was never better than at the present time. Due to better tax collections, the city has entirely wiped out its current loans from the bank and has on deposit today approximately \$80,000.

This is the first time in the history of the city that this condition has existed, and it is said to be due entirely to the improved business conditions experienced here.

Earlier in the year there was occasion when the city was able to wipe out its current bank loans, but there was no surplus.

Eye Tests For Motorists

Suggest Tests For Visual Efficiency For Drivers In Saskatchewan

Saskatoon, Sask.—Something of practical value and of more than passing interest to Saskatchewan motorists is being negotiated by the Saskatchewan Optometric Association in session here.

Harry S. Hay, Saskatoon, has submitted to the meeting a proposal whereby a test of visual efficiency for drivers would be possible.

The association appointed a committee to conduct a thorough investigation of the visual tests to which drivers are subject. This committee will make its report at the next meeting.

Alberta Experimental Tests

May Establish Permanent Experimental Farm In Peace River District

Edmonton.—Experimental tests of an extensive nature are being carried on in Alberta, in common with other parts of the west, stated Dr. J. H. Grisdale, of Ottawa, deputy minister of agriculture. In this province, the work concerning grains and grasses is being undertaken on a large scale while growing of suitable range feeds and tobacco is also receiving special attention.

Dr. Grisdale left for a visit to the Peace River country. While in that area, he will likely select a location for a permanent experimental station as the one now operated at Beaver Lodge is held under a lease. After looking over property in the Grande Prairie, Wembley, and Beaver Lodge districts, he will submit a recommendation as to what section should be acquired by the federal government for the development of its permanent work in the north.

University Women Meet

Membership Of Federation Now Stands At Nearly Two Thousand

Vancouver.—Women's place today, her participation in world affairs, and her limitations because she is a woman, were some of the topics discussed at the fourth triennial conference of the Canadian Federation of University Women by Mrs. Bertha Landes, former mayor of Seattle.

Mrs. Landes said that "the woman who deliberately turns her back upon marriage, upon a home and children is making the greatest mistake of her life, but forcing these things upon women only breeds unhappiness for all."

The membership report of the federation was read by Miss Marjorie Gregg, of Ottawa. The various efforts to increase the membership, which now stands at 1,802, within twenty-seven affiliations, were outlined.

Banff Motor Highway

Ten Miles Of Bituminous Surfaced Road To Be Built As Experiment

Banff, Alberta.—The entire motor highway from the eastern to the western gates of the Banff National Park may be paved with a bituminous surface if experiments now under way under the supervision of J. A. Harkin, commissioner of parks for the Dominion Government, are successful. This information was given out by Mr. Harkin himself.

Mr. Harkin said that the present experiment will include the building of bituminous surfaced roads for five miles east and five miles west of Banff, making ten miles in all.

Labour Premier's Canadian Tour

Ex-Premier Rt. Hon. Ramsay MacDonald at the throttle of a Canadian Pacific engine at Schreiber with his daughter Sheila standing in the door of the cab. Miss Sheila had ridden in the engine from Schreiber to Bolckow, Ontario, while on their trip to the West. "It was most exciting," she said. Mr. Ramsay MacDonald and his three daughters were delighted with the scenery of Northern Ontario along the Canadian Pacific main line.

MIGRATION PLAN IS ESSENTIALLY BRITISH PROBLEM

Toronto, Ont.—While the province of Ontario is willing to co-operate in every possible way in bringing the immigration scheme suggested by Lord Lovat to fruition, Premier Ferguson expressed the opinion that the matter was essentially a British rather than an Ontario problem.

Discussing the conference held with Lord Lovat in his office here, the premier stated that he looked forward with great optimism to the final result although he admitted that the paramount question of finance had not been definitely settled.

The premier pointed out that the Ontario government was already lending money to Ontario farmers and financing settlers in Northern Ontario.

Under the scheme the British government is working directly with the Dominion Government and financial details are being worked out between these two governments.

"Would the British Government be willing to finance the scheme if Ottawa decided not to enter into agreement," the premier was asked. "That is what we were discussing yesterday," replied the premier.

"It will also be a subject of further conference when I meet Lord Lovat again. The British Government is willing to assist in financing the men and I gather from Lord Lovat that the discussions at Ottawa have been satisfactory."

The premier expressed the opinion that if the farmers of Ontario paid a yearly wage rather than seasonal, no difficulty would be encountered in keeping the men on the farms.

Vessels Are Leaving For Hudson Bay

Ship Movements From Montreal To Bay Have Been Numerous This Season

Montreal.—Ship movements from Montreal to Hudson Bay have been fairly numerous this season with departure of dredges, hopper barges and other craft for service at Fort Churchill, terminus of the Hudson Bay railway, where a modern ocean harbor is being developed. Three more vessels sailed recently from the Canadian Vickers shipbuilding plant, comprising another 8-yard dipper dredge, Churchill No. 1, which was constructed by that firm, a self-propelling hopper barge, Chesterfield, which was built by the Collingwood Shipbuilding Company and the powerful tug, Dainty, purchased by the Canadian Government from the Irish Free State.

Refused To Fly With Lindbergh

Little Girl Has Distinction Of Being First One To Pass Up Chance

Wabash, Ind.—Marilyn Lochwood, 9, granddaughter of Mrs. Eva Pettit, turned down a personal invitation of Colonel Charles A. Lindbergh to take a flight in a plane with him as pilot. Answering the Colonel's request, the little girl said: "I never fly with anyone but my dad."

Lindbergh said, "Young lady, you have the distinction of being the first person to refuse to fly with me."

Hints At Separate Agreement

Toronto.—Premier Ferguson says that Britain must finance her own immigrants, following his discussion with Lord Lovat. He said, however, that in the event of the Federal Government not entering into satisfactory arrangement with Lord Lovat, Ontario might make her own pact with the British Government.

Use Niagara Falls As Screen

Niagara Falls, Ont.—An interesting addition to the attractions of Niagara Falls was suggested by Mayor H. P. Stephens who claimed that it was possible to project motion pictures on the American Falls, at a meeting of the committee in charge of the illumination. A special committee will investigate the proposal.
